Supplemental Action

The restrictions requirement mailed on 9/29/05 was withdrawn.

A new Election/Restrictions is required as follows.

Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 6-9 , drawn to a probe array, classified in class 324, subclass 754.
- II. Claims 10-14, drawn to a method for manufacturing the probe array, classified in class 29, subclass 592.1

The inventions are distinct, each from the other because:

Inventions II and I are related as process and apparatus for its practice.

The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and material different process such as a process using a wire bonding machine for manufacturing the probe array as shown by US Publication No. 2003/0116346.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2829

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
